

Title Slide

- Project Title
- Student Name
- Roll No / Batch
- Course: ML Mini Project
- Guide Name
- Institute Name

Problem Statement

- Final problem definition
- Objective/s of the project
- SDG Mapping
- How the project useful to society?

Literature Summary

- Literature Survey Summary (Examples given)

Ref	Author	Problem	Dataset	Method	Features
[1]	ABC, 2022	Drowsiness detection	NTHU Dataset	CNN	Eye images
[2]	XYZ, 2023	Fatigue detection	Custom dataset	SVM	Eye blink rate
[3]					
[4]					
[5]					
[6]					
[7]					

Literature Summary

- Literature Survey Summary

Ref	Accuracy	Limitations	Research Gap	Your Contribution
[1]	91%	Needs high compute	Not real-time	Lightweight model
[2]	85%	Low accuracy	Limited features	Multi-feature model
[3]				
[4]				
[5]				
[6]				
[7]				

Research Gaps Identified

System Architecture

- Final block diagram
- End-to-end workflow

Dataset & Pre-processing

- Dataset description
- Final features used
- Preprocessing steps (Flowchart / diagram)

Methodology

- Algorithms used
- Model pipeline
- Tools & technologies

Model Comparison

- Comparison of all models
- Performance metrics table

Best Model & Justification

- Selected model with its evaluation metrics
- Reason for selection

Results & Analysis

- Confusion matrix or RMSE
- Graphs/plots (Explain the results)
- Key observations

System Demo

- Screenshots / live demo
- Input-output examples

Contribution

- What is new in your work
- Improvements over existing methods

Challenges & Solutions

- Problems faced
- How they were solved

Future Work

- Possible improvements
- Extension ideas

Research Paper Overview

- Paper structure followed
- Target conference/journal

Phase-3 Deliverables

- Final PPT
- Working code (Notebook)
- Dataset
- GitHub repo
- Research paper (mandatory)

Conclusion

- Summary of work
- Key learnings

References
